OBJECTIVE

Motivated Full Stack Developer with experience in building responsive web applications using React, Node.js, Express, and MySQL. Strong understanding of both frontend and backend development, REST APIs, and database design. Passionate about writing clean code and learning new technologies.

EDUCATION

Coimbatore Institute of Engineering and Technology **2021 - 2025**
B.Tech - Information Technology | CGPA: 7.84

SKILLS

Web Development	: Html, CSS, Bootstrap, JavaScript, React.Js, Node.Js, SQL
Tools & Platform	: VS Code, GitHub, Postman
Area of Interest	: Full Stack Development

INTERN EXPERIENCE

Top Class Entertainment LLP | Full Stack Developer Intern **Mar - Sep 2025**
Project: Dream Travel - Flight Booking Portal

Front End | HTML, CSS, JavaScript, React.js

- Worked on small UI tasks and enhancements across the website
- Implemented user-friendly layouts for the Dream Travel flight booking portal
- Integrated frontend components with backend APIs
- Improved UI based on functional requirements and user flow
- Ensured cross-browser compatibility and basic responsiveness

Back End | Node.js

- Worked with Node.js for backend development
- Modified and optimized backend queries based on user requirements
- Assisted in handling API logic and data flow between frontend and backend
- Debugged and fixed backend issues related to data handling
- Supported dynamic content updates for the flight booking system

PROJECTS

Todo Application for Daily Task | Software Based **2025**

- Built a full stack Todo application to help users plan and track their daily tasks
- Technology Used: HTML, CSS, JavaScript, React, Node.js, MySQL

Personal Portfolio Website | Software Based **2026**

- Designed and developed a personal portfolio website to showcase projects and skills
- Technology Used: HTML, CSS, JavaScript, React

Role Based Access Control - Member Management System | Software Based **2026**

- Developed a member management system with role based access control to manage user permissions
- Technology Used: HTML, CSS, JavaScript, React, Node.js, MySQL

Fake Logo Detection | Software Based **2024**

- Built a logo detection system that compares a sample logo with an input logo to distinguish real from fake
- Technology Used: Python, Deep Learning, OpenCV, YOLO Algorithm

CERTIFICATIONS

- AI Fluency - Anthropic - AI Fundamentals
- Introduction to Prompt Engineering - SimpleLearn / SkillUp
- Participant of National Conference on Contemporary Improvements in Engineering
- Completed 6 Months Full Stack Development Internship Certification at Top Class Entertainment LLP
